DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2,5,11-14,17 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification as originally filed has failed to disclose the newly added claim limitation to claims 2 and 11 respectively “***simultaneously applying a common signal voltage to a plurality of pixel electrodes of a plurality of pixels connected to a signal line***” and “***second means for simultaneously applying a common signal voltage to a pixel electrodes of the detected pixels***”. Thus, applicant’s as first filed the specification does not manifest that the applicant had possession of the currently claimed invention at the time of filing.

Claims 5,12-14,17 and 24 are rejected since they depend on rejected claims 2 and 11.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “**simultaneously applying a common signal voltage to a plurality of pixel electrodes of a plurality of pixels connected to a signal line**” and “**second means for simultaneously applying a common signal voltage to a pixel electrodes of the detected pixels**” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1,3,4,6-1016,19-23,25-29 are allowed.

5. Response to Arguments

6. Applicant's arguments with respect to claims 2,5,11-14,17 and 24 have been considered but are moot in view of the new ground(s) of rejection.
